Site-specific safety precautions must be identified and addressed adequately in a site-specific Health and Safety Plan (HASP); the provisions in the HASP must be acknowledged and implemented by all members of the field team. 2. 3 Equipment and Supplies Field personnel must allow sufficient time to order and obtain, test, quality assure, and familiarize themselves with the equipment and supplies required for this water-and sediment-sampling operation. A list of recommended equipment and supplies can be found in Appendix B, with additional information given in each section of this report (for example, Section 5, for field measurement instruments, and Section 6, for water sampling). Use of a photoionization detector (PID) is required when working in areas contaminated by petroleum products (see Section 3. 0). A Global Positioning System (GPS) instrument is used by each team to document and verify site and sampling locations. In addition, documentation of...
