

Beyond Traditional Phonics: Research Discoveries and Reading Instruction

By Margaret Moustafa

Pearson Education Limited, United Kingdom, 1997. Paperback. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book. Looking beyond the print system involved in learning to read, researchers have made discoveries about the role of linguistic and cognitive systems. This text outlines this research which seeks to challenge traditional assumptions of how children learn to read, and relates these discoveries to reading instruction. It demonstrates discoveries about the linguistic processes that children use to figure out unfamiliar print words, how children learn letter-sound correspondences, how children begin their journey into literacy, and methods of teaching phonics based on children's natural learning strategies. It offers suggestions on creating a research-based infrastructure to support reading instruction.

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
