Tebbo, Australia, 2011. Paperback. Book Condition: New. 296 x 206 mm. Language: English . Brand New Book. Flexitime (or flexitime, flexi-time, originally derived from the German word Gleitzeit which literally means sliding time) is a variable work schedule, in contrast to traditional[citation needed] work arrangements requiring employees to work a standard 9am to 5pm day. Its invention is usually credited to William Henning. Under flexitime, there is typically a core period (of approximately 50 of total working time/working day) of the day when employees are expected to be at work (for example, between 11 am and 3pm), while the rest of the working day is flexitime, in which employees can choose when they work, subject to achieving total daily, weekly or monthly hours in the region of what the employer expects, and subject to the necessary work being done. A flexitime policy allows staff to determine when they will work, while a flexplace policy allows staff to determine where they will work.
